Ilan Pappe's book has been updated to include the dramatic events of the 1990s and the early twenty-first century. These years, which began with a sense of optimism, as the Oslo peace accord was being negotiated, culminated in the second intifada and the increase of militancy on both sides. Pappe explains the reasons for the failure of Oslo and the two-state solution, and reflects upon life thereafter as the Palestinians and Israelis battle it out under the shadow of the wall of separation.

Ilan Pappe is Senior Lecturer in Political Science at Haifa University in Israel. He has written extensively on the politics of the Middle East, and is well known for his revisionist interpretation of Israel's history. His books include *The Making of the Arab-Israeli Conflict, 1947-1951* (1992/4) and *The Modern Middle East* (2005).

**Praise for the first edition**

'Along with the late Edward Said, Ilan Pappe is the most eloquent writer of Palestinian history. He is also one of the most scholarly... here, for the first time, is a textbook on Palestine that narrates the real story as it happened - a non-Zionist version of Zionism... To its credit, Cambridge University Press has published Pappe's pioneering and highly accessible work as an authoritative history.'

*New Statesman*

'... a unique contribution to the history of this troubled land, and all those concerned with developments in the Middle East will have to read it... Designed for students and general readers, the book's new approach to the analysis of well-known events will be of interest to academics, journalists, foreign-policy makers... The inclusion of illustrations, maps, short biographies, a glossary of terms, a bibliography, and a reliable index further increases the usefulness of the book.'
